

Generative AI Acceptable Use Policy

Policy ID: AI-003 | Effective: July 2026 | Owner: AI Governance Office

Portfolio-use notice: This is a fictional enterprise policy created solely for educational, testing, and portfolio demonstration purposes. It does not represent the practices of a real organization.

1. Purpose

This policy governs the responsible use of generative AI and machine-learning tools at Vertex Dynamics.

2. Approved Use

- Drafting, summarization, brainstorming, coding assistance, and analysis may be performed using company-approved AI services.
- Employees remain responsible for reviewing accuracy, tone, confidentiality, legal compliance, and business suitability before using AI-generated output.

3. Prohibited Inputs

- Restricted data, passwords, security keys, or authentication secrets.
- Customer personal data, protected health information, payment card data, or nonpublic financial results unless the AI service is specifically approved for that data.
- Attorney-client privileged material or confidential merger and acquisition information.

4. Human Review

AI-generated content may not be used as the sole basis for employment, legal, credit, safety, or other high-impact decisions. A qualified human reviewer must verify the supporting evidence and final decision.

5. Transparency and Attribution

Material externally published with substantial AI assistance should be reviewed under the applicable communications process. Teams should document the model, purpose, reviewer, and source materials for high-impact internal use cases.

6. Security and Procurement

New AI tools must complete Security, Privacy, Legal, and Procurement review before enterprise use. Employees may not connect unapproved AI tools to company repositories or production systems.

7. Reporting Concerns

Employees should report suspected data leakage, harmful output, bias, hallucination, or unauthorized AI use to the AI Governance Office at aigovernance@vertexdynamics.example.
